SECTION 1

HOW TO CHOOSE

1.1 PURPOSE.

Nick, thanks for reaching out. The Corvette shot at 0:04 is a full 3D shot, and the first thing I need from you is the exact car. Your animatic uses a stand-in with a rear wing, so the model and year are still open.

Section 2 puts six Corvettes side by side: a photo of the real car next to the production 3D model I would start from. Every model shown is licensed for commercial use. Section 3 does the same for the police cars in the roadblock. Fill in the list in 1.3 and send it back.

1.2 WHY IT HAS TO BE DECIDED NOW.

The car drives the whole shot: the model, the drift animation, the lighting and the roadblock layout all follow from it. With the trailer locking on Sunday 15 November, changing the car after I start would cost days we do not have.

Two things to check on your side:

- **Brand clearance.** Showing a real, badged Corvette can need clearance from Chevrolet. If that is not cleared, I can remove the badges and logos, as most game trailers do. Let me know which way to go.
- **Matching your footage.** If the speedo, pedal or driver inserts are shot in a real car, tell me which one. The 3D car should be the same model, year and colour so the cut holds together.

1.3 YOUR REPLY.

One line each is enough.

HERO CAR SELECTION **REPLY BY WED 11 NOV**

1 Hero car: option and model, e.g. "2A" _____
2 Colour: red as in your notes, or other (shade or reference) _____
3 Rear wing: as the model comes, or add one like the animatic _____
4 Badges: real Chevrolet badges cleared, or removed _____
5 Real car on set for inserts: yes (model, year, colour) or no _____
6 Police vehicles: option from Section 3, or a mix _____
7 Time of day and setting: night city, as in the animatic, or other _____

SECTION 2

HERO CAR OPTIONS

2.1 Left: the real car. Right: the 3D model it would start from, in the seller's own preview render. Paint, wheels and wing are set in my look pass, so judge the body shape, not the colour. Where two models are shown, either works.

OPTION 1 — **C8 STINGRAY · 2020 TO PRESENT**

REAL CAR

3D MODEL 1A · listing

3D MODEL 1B · listing

The current mid-engine Corvette. Clean body, small rear spoiler. The car most people picture when they hear "new Corvette".

OPTION 2 — **C8 Z06 · 2023 TO PRESENT**

REAL CAR

3D MODEL 2A · listing

3D MODEL 2B · listing

Wide-body C8 with bigger intakes. Available with the tall Z07 rear wing. The most "street racer" of the current cars, and closest in attitude to the wing car in your animatic.

OPTION 3 — **C8 ZR1 · 2025 TO PRESENT**

REAL CAR

3D MODEL 3A · listing

The newest and most extreme Corvette: large rear wing, vented hood. Maximum spectacle.

OPTION 4 — **C7 STINGRAY · 2014 TO 2019**

REAL CAR

3D MODEL 4A · listing

The last front-engine Corvette. Long hood, cabin set back, sharp creases. Classic Corvette proportions. Reads as muscle car rather than supercar.

CLIENT SELECTION

OPTION 5 — **C7 Z06 · 2015 TO 2019**

REAL CAR

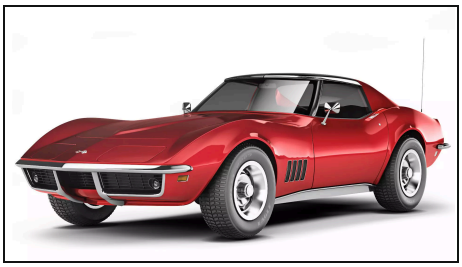

3D MODEL 5A · listing

Supercharged wide-body C7 with a larger spoiler and vented hood. Aggressive front-engine option, big in street-racing and game culture.

OPTION 6 — **C3 STINGRAY · 1968 TO 1982**

REAL CAR

3D MODEL 6A · listing

Classic Coke-bottle shape, long nose, T-top roof. A retro swing. Strong silhouette, less "GTA 6", more "Vice City".

SECTION 3

ROADBLOCK VEHICLES

3.1 POLICE VEHICLES.

The roadblock cars are on screen briefly and read mostly as shapes and light bars, so they matter less than the hero car. If you have no preference I will use a mix of current US patrol vehicles in a generic livery. A real city or department name on the doors is your call; generic is the default.

P1 FORD POLICE INTERCEPTOR UTILITY (EXPLORER)

Current US patrol standard. The most common police car on US roads. Listing.

P2 DODGE CHARGER PURSUIT

Low, aggressive sedan. Strong "car chase" read. Listing.

P3 CHEVROLET TAHOE PPV

Large SUV. Good as a heavy roadblock vehicle. Listing.

P4 FORD CROWN VICTORIA POLICE INTERCEPTOR

Retired classic. Instantly reads as "police" in film and games. Listing.

NOTE

The animatic holds the shot for about 0.7 seconds. If the final edit holds it longer, tell me the target length, because it changes how much detail the roadblock needs.

APPENDIX A
SOURCES AND CREDITS

A.1 3D model images are the sellers' own preview renders, shown for selection only. Real-car photographs are for reference only.
